1. Transmittal of the translation to the applicant.

The International Bureau transmits herewith a copy of the English translation made by the International Bureau of the international preliminary examination report established by the International Preliminary Examining Authority.

2. Transmittal of the copy of the translation to the elected Offices.

The International Bureau notifies the applicant that copies of that translation have been transmitted to the following elected Offices requiring such translation:

CA, JP

The following elected Offices, having waived the requirement for such a transmittal at this time, will receive copies of that translation from the International Bureau only upon their request:

CZ, EP, PL, US

3. Reminder regarding translation into (one of) the official language(s) of the elected Office(s).

The applicant is reminded that, where a translation of the international application must be furnished to an elected Office, that translation must contain a translation of any annexes to the international preliminary examination report.

It is the applicant's responsibility to prepare and furnish such translation directly to each elected Office concerned (Rule 74.1). See Volume II of the PCT Applicant's Guide for further details.

2. Citations and explanations

Prior art: The earlier publication EP-A-0 637 820 is considered to represent the closest prior art. This document shows a vehicle roof lining with the features mentioned in the preamble to independent Claim 1.

The subject matter of Claim 1 is distinguished from that prior art by the following features: between the reinforcing layer and the decor layer, a semi-permeable migration-resistant barrier layer is provided.

The effect of that distinguishing feature is that air can pass through the barrier layer, but neither the adhesive used, nor components of that adhesive, nor any softener, nor any age-conditioned decomposition products, nor additives from the polyurethane foam or adhesive layers can penetrate, permeate or migrate through the barrier layer.

Novelty: The subject matter of the present application is considered to be novel, because no prior publication contains all of the features of independent Claim 1.

Inventive step: The subject matter of the present application is considered to involve an inventive step,

because the cited prior art documents concerning known linings do not show the characterising features.

Dependent Claims 2-11 concern specific embodiments of the subject matter of Claim 1.

Claim 12 concerns a method for producing a lining of the type defined in Claim 1.

Industrial applicability: The subject matter of the present application is considered to be industrially applicable, because it can be made and used in the vehicle and transport industry.
